Steven is an excellent teacher and really cares about his students - really going above and beyond for them. Throughout the semester, there's a lot of opportunities to provide feedback to him and give input on how the course is being managed, and he clearly looks at how students are doing/performing to figure out how to tailor the course midsemester. He works really hard to help us all learn and succeed in his class.

Very passionate about teaching and helping students:) Thank you very much!

One of my favourite classes! Maybe the final project could be longer than half a semester

Good lecturer with great sense of humor. Care for students' need

I really liked this course and the assignments are super useful and helpful

Steven is a very enthusiastic teacher and a helpful mentor. He is always being helpful and nice to all of the students. He is very considerate as in bringing snacks for students and creating multiple types of live interactions in classes. The assignment instructions were super clear and helpful. However, in a sense, the assignment may have been provided with too much scaffolding and less requirement in student active thinking. The same thing happened in the class. There are too many instructor talking and teacher-centered teaching. Students are not well motivated except for the time of Kahoot related interactions.

Steven is an exceptional educator. He particularly excels at creating a safe space for learning in which students feel comfortable speaking up and asking questions. I like that he is transparent about his expectations for the course and what he thinks are the more important concepts or assignments to pay attention to. I would definitely take another class from Steven.

Steven is a really nice instructor. Really his instruction and classtime

Thank you Steven!!!

Excellent!
