Great instructor!

This has been one of the most impactful courses I've taken! Exceptional teaching structure, consistent encouragement, and a learning environment that truly supports growth.

Best instructor ever!! Feel like he genuinely cares about our learning and also sees us as real people, not just students. I also thought the course as a whole was well structured and had a very reasonable workload

Adobe Captivate was the worst. Six tool tasks is enough.

Steven is one of the most enthusiastic instructors I've ever learned from. His passion for teaching is evident in every class session, and it really helped keep me engaged and motivated throughout the course. He creates an encouraging learning environment where students feel comfortable asking questions and participating. I really appreciated how responsive and supportive he was, both during class and outside of it.

Dear Faculty Interviewers: Not choosing Steven would be a total LOSS. He's the GOAT

Steven is passionate about his teaching, which motivate students as well! He also gives us flexibility to shape our own experience from this course which help maximize my takeaway. Steven respects every student's needs and interests, shout out to Steven!

/

It was clear as early as the first class that Steven really cares about the students and considers our learning in the context of our whole lives, not just in terms of relevance of the coursework to career prospects but also what could be occurring inside and outside the classroom that might impact our success in his class. He created a comfortable environment for class participation and actively incentivized it consistently which in my view led to more participation from a wider variety of students across the course of the class. He has gone above and beyond what is typical at the university level in my experience and I hope he will be compensated for it.

This was an awesome course! I know what the market is like for instructional designers and this course sets you up to have wide variety of projects to put into a portfolio with the commonly used authoring tools out there. Steven is an excellent instructor and his ability to create a supportive learning environment is a rare skill. He's knowledgeable, listens well, personable, dedicated, willing to change based on student feedback, continuously updating the learning material to make course improvements AND he clearly cares about us learning and getting something out of the class. These combinations of traits are very difficult to find in a professor. I don't know why you all haven't hired him already to be a part of the faculty because he's amazing and whatever program he does teach in will be extremely lucky to have him.
